flexible playspaces for all surfaces

# The concept of POPUP PLAY

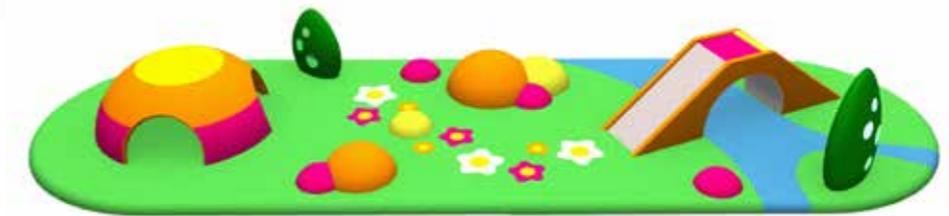

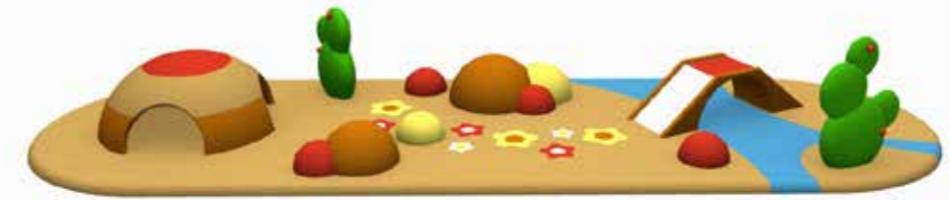

Our most flexible playground concept, RODECO PopUpPlay, is play areas for small or earlier unused surfaces. They are compact, easy to expand, easy to assemble and it is easily removable if the space becomes required for another purpose - that is why it is called popup play!

PopUp play is available for indoor and outdoor use.

## Active children – attractive places

RODECO began as a manufacturer of fun water play products and has become an expert provider of complete playground designs with installations all over the world.

The success has grown out of our philosophy that secure and creative playspaces attracts audiences, encourages the development of growing children, and offers increased customer footfall to help promote your business. Good playgrounds and activity areas generate positive values and increase sales for all businesses located near the playground. A thoughtful, creative and safe play area becomes attractive quickly, not just for the kids but also for their parents. This, in turn, contributes to increased visitor flow, whether it's a shopping centre, mall or smaller stores.

Island fun. A large play area can consist of several smaller PopUpPlay elements within. A concept that comes with benefits: it is even easier to move around, it is very easy to change one product or just to refurbish it to make the area feel like new again.

CENTRALSKOLAN SCHOOL PLAYGROUND - ÅTVIDABERG SWEDEN

# Creative play makes exciting environments

Outdoor playgrounds make the environment POP, a splash of color, some different shapes and happy kids.

An important factor to consider when designing a playground is that playgrounds should be both fun AND safe. Rodeco knows the best way to tailor a play area based on the customers' needs and business, in order to attract both adults and children. Our designers work closely with customers to create the best and most appropriate solution.

Geometric, a shape based environment for learning by playing. Basic shapes and colors that encourage kids to explore the geometry while climbing, running, crawling and sliding.

# Regular services gives your play area a longer life

By looking after you playarea it will look great and be a safe spot for kids for a long time ahead. And we would love to help out!

It is the owner who is responsible for maintaining and managing the playground so that the risk of accidents can be prevented. By signing a service agreement with us, you will ensure that your play area is kept in the best condition. When you sign an agreement with us, we will let you know when it is time to book a new service. The facility is documented and emergency problems can therefore be resolved quickly and efficiently. Damaged or expired components may be replaced before they cause costly downtime – So to prevent accidents make sure your playground is up to date!

Shifting landscape - This large outdoor play zone has a lot of space for running, a mountain slide, fallen birch trees for balancing and the sweetest junipers for hide and seek. Artificial grass and rubber makes a great combination for large areas of safety floors.

## Safety first - focus safety floors

The choice of materials for the safety floor of a playground is one of the most important aspects when designing a safe play area.

To design a playground that is both fun and safe, we have built up expertise and our own production techniques in several key areas. We work with different types of shock-absorbing flooring, which are adapted for different heights in a play area. These safety floors are used whenever there is a risk of falling. Another positive feature of the shock-absorbing flooring is that they also help to reduce noise levels. It provides a quiet, more pleasant environment for the kids and staff who work in the area near the playground. We produce floors that can be placed individually or in a group. All our play products and complete playgrounds are tested and approved according to european standards **SS-EN 1176 & SS-EN 1177**.

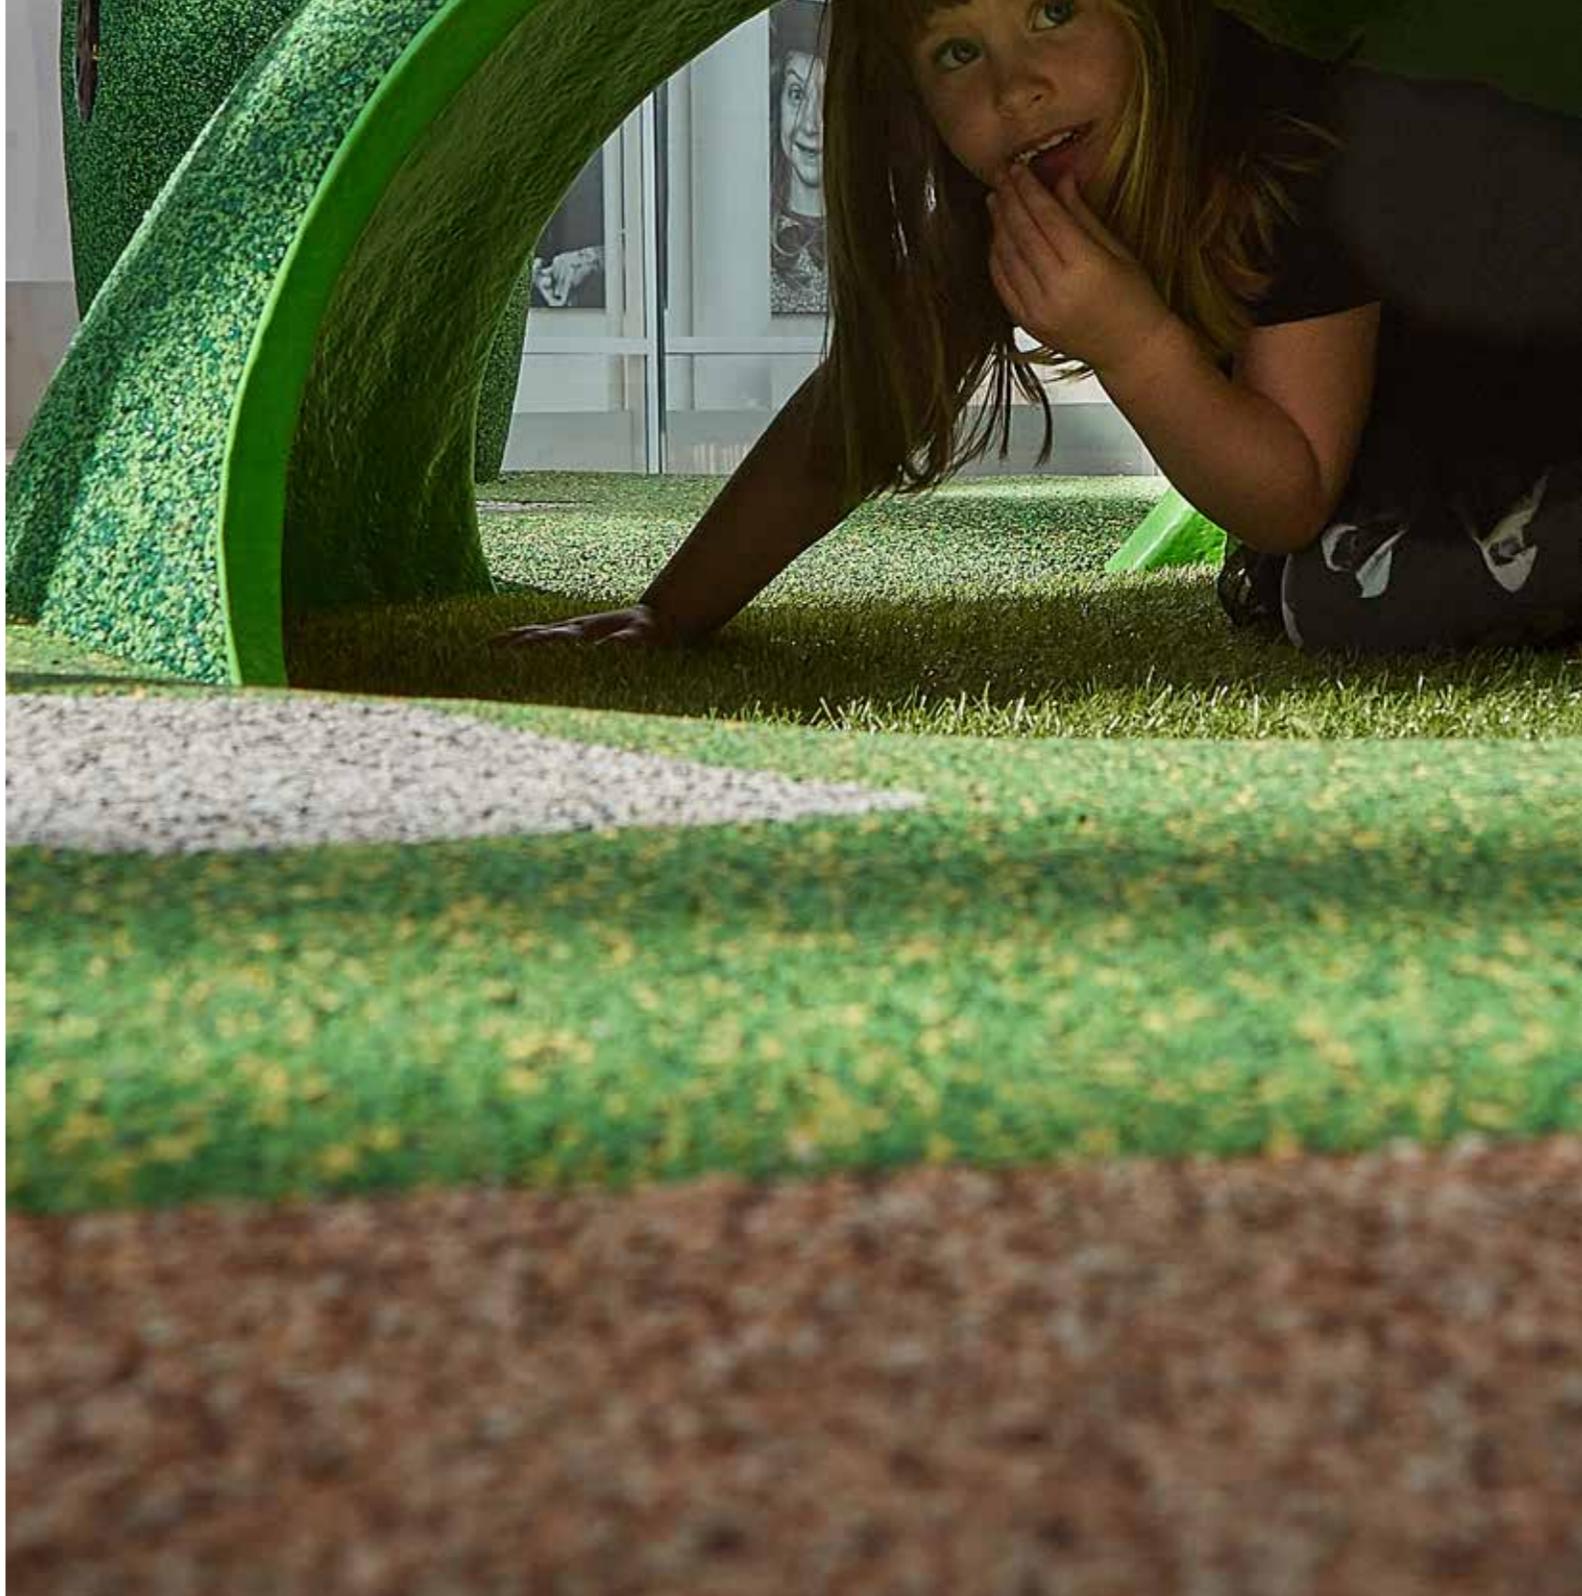

There are a variety of floors to choose from. Rubber for indoor and outdoor use, artificial grass and vinyl. All the floors can be made in nearly any color or shape you might think of! All floors are tested to live up to the European standards SS-EN 1176 & SS-EN 1177.

# Playgrounds that builds a faithful customer base

By installing a play area, we know that not only will it increase the number of visitors to your business, it will also create happier customers that can also see a greater value in your investment than just the possibility of kids play.

Because happy kids creates happy, calm and more relaxed parents. By activating their kids for a while they get the chance to run a few more errands, stay a little longer and trust us - they will go back to that fabulous place the next time as well!

A summer landscape, filled with bright colors and exciting adventures ahead. Crawl, slide, run, jump, hide and swing on this surface. Did you know that we shape the floor to fit your space? And then we design the area to fit your needs!

# Environments that will last for many years of play

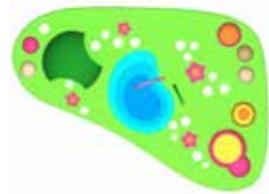

Our play areas have changed a lot during the past 40 years. And they will keep on changing, with environmental concerns in mind.

All materials used in our products are newly manufactured and made with controlled raw materials. We have great flexibility and wide range of our basic materials and can seamlessly mix components of different materials, whether stainless steel, metal, rubber, etc. When continuously developing our products we strive to make them even kinder to our planet by developing our process, choosing different materials or looking for new options in logistics.

Flowers and lollipops, the perfect match! Hiding in the cave is exciting for the small ones, exploring the quants is a challenge for the older kids. Bright and colorful, this playarea will create a happy spot for families in your facility.

# Create effect with wallpapers

A play area itself is a fun installation, but add accessories to the mix and you will get a world full of adventures.

With the right accessories even the smallest space can be turned into an adventure that the kids will love. We design and print wallpapers and self-adhesive stickers to fit the space and the theme that you need. Are you looking for a magic forest, an under water world or to incorporate your brand and mascot? We will take care of this to help you to create the playspot of your customers dreams! By using accessories, together we can create a lovely playarea or an entire playroom that is optimal for your business and budget.

Up in the air, an adventurous play area among the clouds. A helicopter that needs to be climbed, a globe to crawl into, clouds below and above and a hill to slide on.

# Venues in your business creates added value

Areas for relaxing, playing and having a cup of coffee gives life to your facilities.

In the online era, when we are constantly competing with online shopping, we need to offer the customer more reasons to visit and an enhanced physical retail experience. Our aim is to encourage families to visit your business. We achieve this by creating venues for play, reading a book, drinking coffee or to just take a moment to sit down and relax. By integrating play areas into your interior design concept we make it more than just a playground - we create an experience that builds relationships.

# PLAYROOM

MAX MALL OF SCANDINAVIA - STOCKHOLM SWEDEN

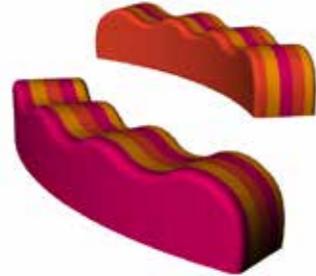

# Accessories for play areas

Create a discoverable play area that challenges a child's mental abilities with fun play accessories.

By adding products like toys, digital screens and touch tables, analogue playframes and craft materials you can create a changeable environment for children to explore over and over again.

Accessories of different kinds also give you the chance to create calm spots in your play room or playspot. An analogue play frame is great for small challenges while the digital accessories come with a wide range of possibilities regarding choice of activity or if the purpose is to engage one or more kids at a time.

Add-ons for your play environment can change the entire area, add some play frames, analogue or digital, for calm spots. Furniture for tired legs, a wallpaper for a complete environment that help in boosting a kids imagination, or a wall that can divide an area. Tell us about your needs and we will find a solution for your business.

For playspots with spaces for craft activities, a waiting room or a café - add some extra toys, paper & crayons and craft materials to make the time spent there more valuable. Together we can create an environment for all senses. Visit us online for more inspiration – [webshop.rodeco.se](http://webshop.rodeco.se)

SATS MÄRSTA - STOCKHOLM SWEDEN

# Playspots for the tiny adventurers

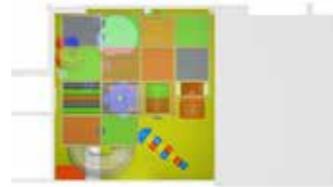

With over 40 years of experience in the industry, we know how children play and how this affects their development.

A well planned, imaginative and fun play area helps the children to develop social and active skills, whilst also supporting neighbouring businesses and operations. Rodeco delivers more than a playground - we create a place that encourages the children's need for physical movement and mental stimulation. Our business concept is developing, manufacturing and installing safe and creative play environments that contribute to the positive development of children and destinations worldwide. We possess great knowledge of children's play and its benefits. Our ambition is to have every wonderful space equipped with attractive play products from RODECO.

Level up! Any space can turn into a great playroom, but it often needs to be adapted to fit the available space. The most awkward space can often become the most exciting playarea.
